It has been placed in the application file, but all of the information referred to therein has not been considered. No copy of USSR 974,977 has been filed. Only the initialed references have been considered.

Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 112

The rejections under 35 USC 112 are hereby withdrawn in view of the claim amendments filed 11/10/05.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-2, 5, and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over LUSSIER (US 5,130,545).

Applicant's arguments filed 11/10/05 have been fully considered but they are not persuasive. In response to the argument that LUSSIER does not teach obtaining a sample of raw product from a plant to be analyzed, it is noted that as a "sample" is not limited to be any specific portion of a plant, any percentage, or size, etc., an entire plant may be a "sample." Further, LUSSIER specifically teaches scanning a single leaf from a plant in col. 5, lines 63-col. 6, line 12, and exemplifies doing so in Figure 3. In response to the argument that LUSSIER does not teach providing a plurality of product processing records, it is noted that applicant admits on page 5 of the response that LUSSIER does teach providing stored records comprising data for product (plant) growth, productivity and health. As plant growth habits and health are certainly indices "associated with" product processing (e.g. growth and harvesting of the plants), the examiner maintains that LUSSIER's stored records are broadly and reasonably interpreted to be the "plurality of product processing records" recited in step (c) of claim 1. In response to the argument that LUSSIER does not teach determining suitability of a sample for "derivative use" as set forth on page 5 of the response, applicant is reminded that a "derivative use" is not recited in the claims. Instant claim 1 merely recites determining the suitability of samples for processing into a uniform quality end product. It is noted that further growth (e.g. from seedling to mature flower) may be considered a form of "processing" wherein the "uniform quality end product" is the mature specimen (flower, tree, etc.), thus the examiner maintains that determining the

Art Unit: 1631

overall health and quality of a plant, as taught by LUSSIER, is a determination of the suitability of a plant for processing into a uniform quality end product. As previously set forth, LUUSIER teaches that a desired goal of his method is optimized plant growth, thus the examiner maintains that LUSSIER does at least suggest selecting plants, which when "processed", provide a uniform quality end product.

For the reasons set forth above, and the reasons and motivations previously set forth, the examiner maintains that LUSSIER teaches and/or suggests all of the claimed limitations, and maintains the rejection.

Conclusion

No claims are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
